

# Conserve Water

**Kennebunk, Kennebunkport & Wells Water District** is offering the sale of rain barrels for \$60.00 (\$125 retail), on a trial basis, as part of our on-going efforts to promote.

These rain barrels are made from recycled 55-gallon food grade barrels that are easy to install and use. They feature a solid brass threaded spigot that can be connected to a regular hose or soaker hose and a fully screened intake port that keep mosquitoes, insects and debris out.

- Rain barrels provide an effective way to capture rain water from your roof and store it for later use.
- Water collected by rain barrels can be used to water lawns, gardens, and indoor plants. This water would otherwise run off your roof or through downspouts and become storm water, picking up pollutants on its way to a storm drain, stream, or lake.
