Kerri,

I just now came across this, below. As a Public Water System we need to report any detected UCMR3 contaminants in our CCR, which will be distributed to our customers by July 1<sup>st</sup>. The following is an excerpt from this URL:  
<https://www.epa.gov/sites/production/files/2016-05/documents/ucmr3-factsheet-list1.pdf>

Under the **Consumer Confidence Report (CCR) Rule**, as specified in 40 CFR §141.153(d), CWSs must report the monitoring results whenever unregulated contaminants are detected. CCRs are delivered to all billing customers each year by July 1. (The CCR Rule does not apply to non-community water systems). Details on these reporting requirements can be found on the CCR Home Page.

This may dictate the timeframe for certain events. Feel free to call me to discuss.

Thanks,

Norm
